

Your AI setup should stay yours

Tick each one before you pay anyone to set up AI in your business.

-
- ☐ You hold the vendor accounts, subscriptions and two-step verification. Any setup access is explicit and can be revoked.
-
- ☐ Your business knowledge is organized and backed up. Private payroll and client records stay out of demonstration data.
-
- ☐ Supported tools and included workflows are named. Extra custom integrations are scoped separately.
-
- ☐ Customer messages, payments, bookings and publishing have clear approval boundaries.
-
- ☐ Tests show a clean start on your computer, your data kept separate from anyone else's, safe failures, duplicate handling, and proof that actions reached their destination.
-
- ☐ You can run, pause, diagnose, export and recover the workflow yourself.
-
- ☐ Support hours, duration, ongoing vendor costs, exclusions and ownership are written down.
-
- ☐ Industry craft instruction comes from a qualified instructor where it is needed.

No setup connects to every app, and none guarantees sales. No accreditation is implied.

Pretty Creative Company · prettycreative.company/immersion · A worksheet to scope a conversation. It does not certify readiness, guarantee results or imply accreditation. Never write passwords here.
